

## SUNNY-NET Static DNS Setup Instructions for Netgear

### To set static DNS servers on your NETGEAR router:

1. Open a web browser on a computer or WiFi device that is connected to your NETGEAR router.
2. Type <http://www.routerlogin.com> or <http://www.routerlogin.net> in the web browser address bar.  
You are prompted to log in to your router.
3. Enter **admin** for the user name and **password** for the password.  
If you changed your admin password, enter the password that you created.  
NETGEAR genie displays.
4. Click **Internet**.
5. Select **Use these DNS Servers** and enter your primary DNS address:  
**209.58.180.215, 198.7.62.199**

---

#### Domain Name Server (DNS) Address

Get Automatically from ISP

Use These DNS Servers

Primary DNS

Secondary DNS

209	·	58	·	180	·	215
198	·	7	·	62	·	199

---

6. Click **Apply**.  
Your settings are saved.
